The **Student Monitoring Delete Confirmation** page allows you to delete the student from the **Transfer Monitoring List** page. Student Monitoring records should only be deleted if the student will not be attending your school, or the student was added to your school's list in error. Do not delete a student simply to stop monitoring him or her. Once the delete has been confirmed, the student's information will be removed from the Monitoring and, if applicable, Alert lists. Transfer Monitoring Re-Populate

Purpose of this page

The Transfer Monitoring Re-Populate page allows school users to retrieve those students previously submitted that no longer display on the Transfer Monitoring List page. This will allow the user to add students back to the Inform list for additional Transfer Monitoring.

[Navigation](#)

The Navigation Tabs and their links allow you to navigate to the main pages of each section of the site.

How to retrieve student information previously submitted for Transfer Monitoring

The Search/Retrieval Options allow you to designate which students you wish to retrieve. You may retrieve students based on SSN, Last Name, previously listed Enrollment Begin Date, or previously listed Monitor Begin Date. The selection is made in the **Sort By** option.

Sort by - Allows you to retrieve and display student Transfer Monitoring records by:

- *SSN (Default)*-Displays student records in ascending numeric order by student Social Security Number.
- *Last Name*-Displays student records in ascending alphabetic order by student last name.
- *Enroll. Begin Date*-Displays student records ordered by the Enrollment Begin Date.
- *Monitor Begin Date*-Displays student records ordered by the Monitor Begin Date.

To retrieve ALL students by one of these sort orders:

1. In the **Sort by** list, click the selection or leave the default selection of SSN.
2. Click **Retrieve**.
3. The **Re-Populate Transfer Monitoring List** page displays with all the most recent students previously listed for transfer monitoring who are no longer on your Inform list.

Use the additional Search/Retrieval Options to refine the list you wish to review.

Note:

- The Re-Populate Transfer Monitoring List displays 20 students per page. The search options you select on the Transfer Monitoring Re-Populate page apply to all results on subsequent

pages display using the arrow icons. To change search options, you must return to Transfer Monitoring Re-Populate page.

How to use the Search/Retrieval Options

Search/Retrieval Options can be used to focus the students retrieved based on more defined criteria. You will still select the Sort By option to determine how the data is to be displayed but may further refine information to be retrieved by using any of the following:

- **Last Name Begin / End** - Allows you to retrieve records for students whose last names fall within an alphabetic range. You may use a single letter (such as 'A') rather than a whole name. Be careful to be inclusive when typing the End value if using single letters. A single letter End value (such as 'B') will not retrieve names that begin with that letter (such as 'Ball') since the names come after the letter alphabetically. You also have the option of not entering an End value which will retrieve all students beginning with the name in the Begin value through the end of the alphabet.
- **SSN Begin / End** - Allows you to retrieve records for students whose Social Security Numbers fall within a numeric range. Be careful to be inclusive when typing the End value. An End value containing fewer than nine digits (such as '99') will not retrieve SSNs that begin with that number but contain more digits (such as '990-00-0000'), since the longer number comes after the shorter one numerically. To retrieve a single student, enter the SSN in both the Begin and End fields.
- **Previous Enrollment Begin Date Begin/ End** - Allows you to retrieve records for students whose previous reported Transfer Monitoring enrollment begin date fall within a specified date range. The Begin and End values are inclusive; that is, records with an Enrollment Begin Date equal to the Begin or End date are retrieved, as well as records Enrollment between those two dates.
- **Previous Monitor Begin Date Begin/ End** - Allow you to retrieve records for students whose previous reported Transfer Monitoring monitor begin date fall within a specified date range. The Begin and End values are inclusive; that is, records with a Monitor Begin Date equal to the Begin or End date are retrieved, as well as records Monitored between those two dates.

Re-Populate Transfer Monitoring List

Purpose of this page

The Re-Populate Transfer Monitoring List page allows school users to update Transfer Monitoring information for students previously submitted and no longer displayed on the Transfer Monitoring List web page for their school. Students submitted from the re-populate page will be added to the school's current Transfer Monitoring List.

[Navigation](#)

The Navigation Tabs and their links allow you to navigate to the main pages of each section of the site.

Re-Populate Transfer Monitoring List displays up to 20 student records at a time. If the search options you typed retrieve more than 20 records, those records are spread across as many pages as necessary to display them 20 at a time. Use the Next and Previous arrows to move from page to page.

You must submit and confirm any changes to the re-populate records displayed on an individual Re-Populate Transfer Monitoring List page before navigating to another page. Clicking the Previous or Next arrow, or otherwise navigating to another page, before submitting and confirming changes causes any new data you typed to be lost.

How to update transfer student information on the re-populate monitoring list

To update transfer student monitoring information:

1. Type an Enrollment date in the **Enrollment Begin Date** box. This date is used to populate the Enroll. Begin Date box of the individual student records you select in step 3 below.
2. Type a Monitor date in the **Monitor Begin Date** box, or accept the default date (the current date) displayed by the page. This date is used to populate the Monitor Begin Date box of the individual student records you select in step 3 below.
3. Select the transfer student monitoring records you want to re-populate. There are two ways to do this:
 - a. Select the records individually by clicking the check box to the far left of the row with the student's SSN, name, and DOB.
 - b. Select all the records displayed on the page by clicking **Check All** at the top of the form. (You may individually uncheck records if using the Check All option.)
4. Update as necessary for each individual student the information in the following boxes:
 - a. Enroll. Begin Date (Enrollment Begin Date)
 - b. Monitoring Begin Date

5. Click **Submit Checked Rows**.
6. If the information you submitted passes the edits applied by the NSLDS, the data is saved to the database.

When updating transfer student monitoring information, keep in mind the following:

- If you check records (Step 3) but then decide that you do not want to update them, uncheck the records individually or click **Uncheck All** at the top of the form. When you uncheck a record, the enrollment begin and monitoring begin dates revert to whatever date they were set to before you selected the record.
- Submitting an update to a student's transfer monitoring record causes that student to "disappear" from the Re-Populate Transfer Monitoring List page. This happens because your updates cause the record to be displayed on the Transfer Monitoring List page. To view your submitted record, navigate to the Transfer Monitoring List page and use the SSN search to find the student.
- Monitoring Duration is the number of days NSLDS will monitor your students beyond the enrollment period begin date. It will be displayed at the top of the transfer student re-populate page and can be updated on the School Transfer Profile web page.

Understanding transfer student re-populate monitoring list records

The Re-Populate Transfer Monitoring List page displays individual student records across two rows. The first row is shaded and contains the following items, from left to right:

- **Check Box** - Click this box to select a record for re-populating the monitoring list page. You can check records one-by-one, or you can check all the records on the page by clicking **Check All**.
- **Number Icon** - Each record on the page has a number icon. Records are numbered in ascending sequence and displayed in groups of 20. As you submit records for update new records will roll up from the bottom keeping the list always at 20. Although individual records may "disappear" in this fashion, the group of records displayed on the page retains its integrity until you retrieve a new set of records or leave the re-populate transfer monitoring list page entirely.
- **SSN**-The student's Social Security Number.
- **Name**-The student's full name (first name, middle initial and last name).
- **DOB**-The student's date of birth.

The second row is not shaded and contains the following items, from left to right:

- **Enroll. Begin Date**- The date the student is expected to, or did begin classes at the school. There are two ways to change the enrollment begin date for an individual transfer student record:
 1. Type a new Enrollment Begin Date at the top of the page and then check the transfer student record. By default, the enrollment begin date is set to a blank date because enrollment start dates vary from institution to institution.

2. Check the transfer student record first and then edit the contents of the Enroll. Begin Date box directly.
- **Monitor Begin Date**-The date you would like NSLDS to begin monitoring the student. There are two ways to change the enrollment begin date for an individual transfer student record:
 1. Type a new Monitoring Begin Date at the top of the page and then check the transfer student record. By default, the monitoring begin date is set to the current date but can be modified for a future date if desired.
 2. Check the transfer student record first and then edit the contents of the Monitoring Begin Date box directly.
